DURALITE

Hi-Tech Lighting Features

ABOUT US

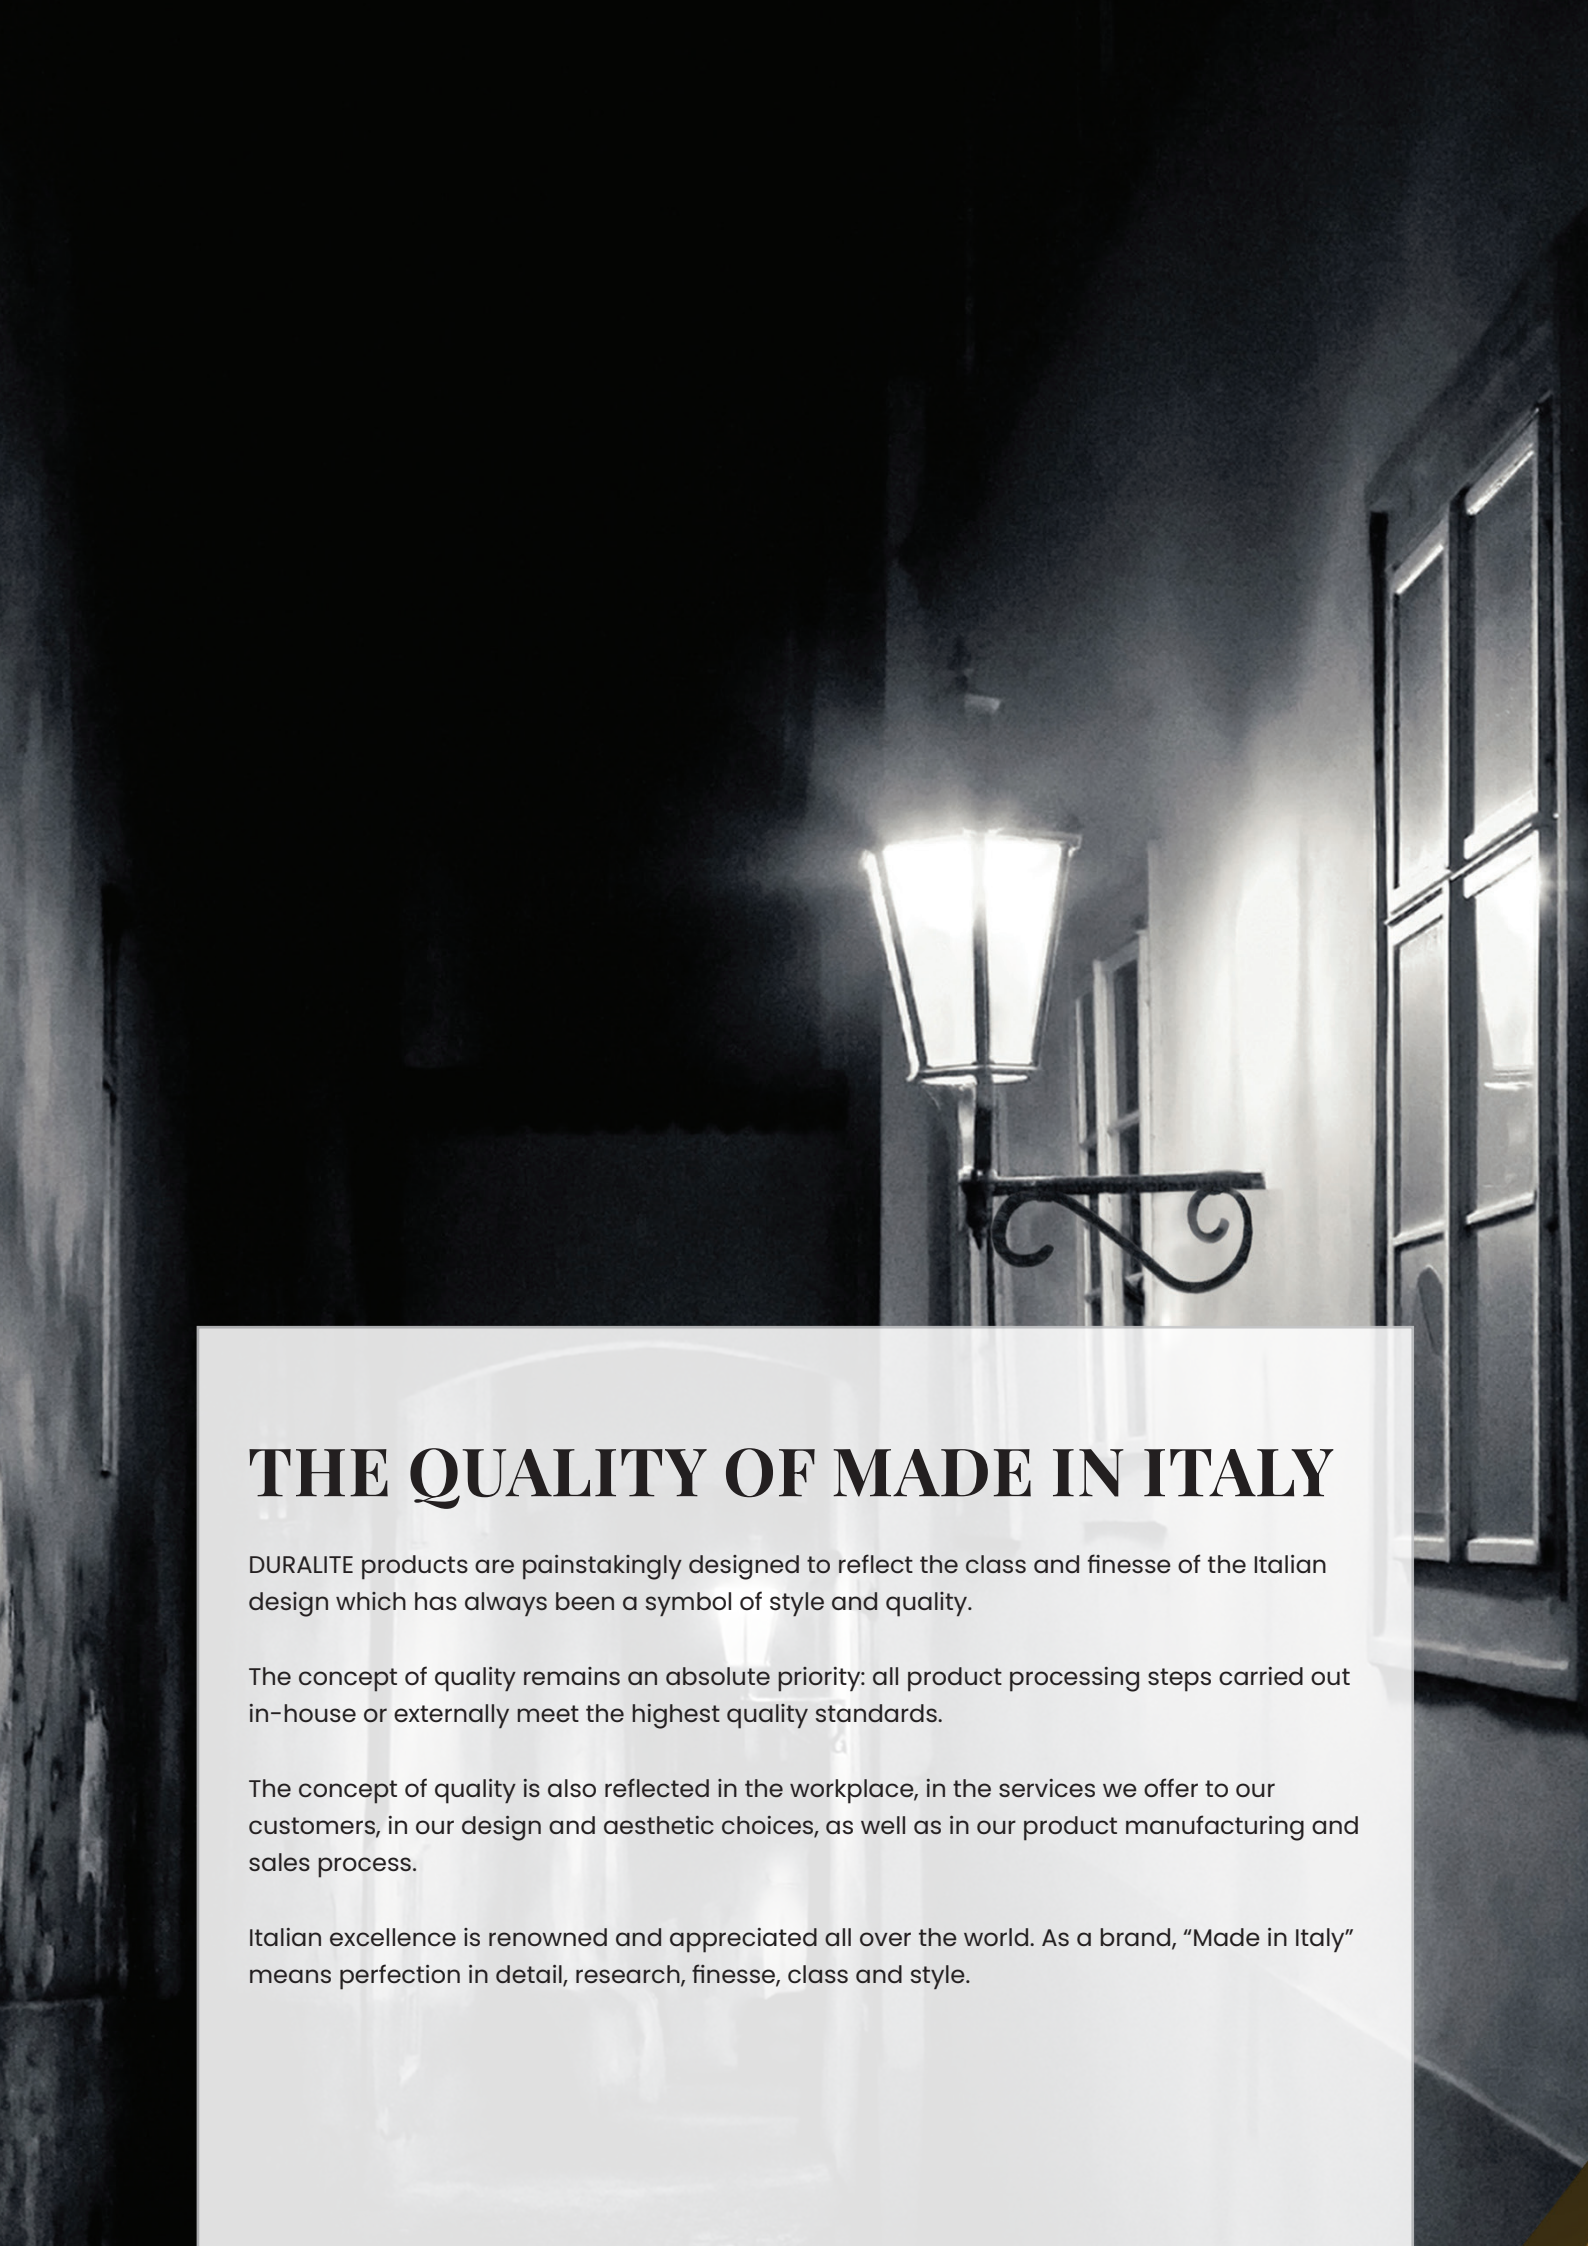
DURALITE was born out of a thirty-year strong experience in designing and manufacturing of aluminium tools and the same long presence in aluminium casting industry.

Why not apply this vast experience even to the lighting technology?

Our painstaking products research, design and full development within the company are our key to propose ever modern and actual fixtures, capable of meeting any requirements in the residential lighting for outdoor use.

Each and every piece is the fruit of constant market research and continuous improvement.

Our perfect knowledge of the characteristics of the various materials to be used is the propelling force behind our ability to produce complete series of products with different aesthetic and technologic configuration capable of compete at international level and perfectly adapting to the ever-varying market we operate in today.



THE QUALITY OF MADE IN ITALY

DURALITE products are painstakingly designed to reflect the class and finesse of the Italian design which has always been a symbol of style and quality.

The concept of quality remains an absolute priority: all product processing steps carried out in-house or externally meet the highest quality standards.

The concept of quality is also reflected in the workplace, in the services we offer to our customers, in our design and aesthetic choices, as well as in our product manufacturing and sales process.

Italian excellence is renowned and appreciated all over the world. As a brand, “Made in Italy” means perfection in detail, research, finesse, class and style.

THE EVERLASTING CLASSIC MEETS THE MODERN

With our Duralite classic lines, we are able to meet the needs of customers looking for residential lighting solutions, as well as lighting solutions for squares, parks or hotels with a classy and refined style.

By producing a wide range of both Duralighting® resin and aluminium products, we offer our customers a chance to evaluate the model that best suits their needs.

The tradition of the timeless classic combines with the innovation typical of modern products: besides a painstaking and continuous research on the quality of materials and components, part of our lanterns has been fitted with state-of-the-art LED technology, perfectly merging the past and the present.

SERVICES AND ENVIRONMENTAL FRIENDLY

Customer Care

Our website and constantly operating telephone lines help us guarantee an efficient customer care service.

Techincal Support

Thanks to the experienced gathered over the years, at DURALITE we are in a position to offer both pre and after sales technical support.

Just in Time

Is a system of supplying goods as close as possible to when they are actually needed.
JIT is one of the propelling forces behind DURALITE. In-house production guarantees quick delivery time thus facilitating the customer in terms of sales and warehouse management.

Eco-sustainability

All Duralite products are carried out in harmony with the envinronment that includes light control, material choice and production in conformity with natural environment.

RESIN MATERIAL DURALIGHTING®

Outdoor lighting requires painstaking search of materials and technologies most suitable to guarantee high resistance.

Thus, not only did we - at **DURALITE** - conceive and patent a material which subsequently led to solid and long lasting products, but we also maintained a classy design and finishing: **DURALIGHTING®**.

DURALIGHTING® is a resin resistant to corrosion and caustic substances.

It is a UV-stabilized material resistant to any atmospheric agent.

Thus, thanks to this resistance, it is suitable for any climatic condition and above all in coastal areas with particularly high salt values.

Products made using **DURALIGHTING®** have a specific weight and smooth metal-like classy finishing.

In addition, **DURALIGHTING®** is not painted: the colour is in the raw material and thus no problems related to discoloration and fading, hence requiring least maintenance possible.

ANTI CORROSION
Resistant to any atmospheric agent

UV STABILIZED
Protected from the long-term
UV degradation effects

NO MAINTENANCE
Painting not necessary
– the color is in the paste of raw material-

SAFETY FIRST!

DOUBLE INSULATION
Not require a safety connection
to electrical earth

Kg

HIGH SPECIFIC WEIGHT
Heavy and strong material

ELEGANT STYLE AND SMOOTH FINISH
High quality and great apparence

ALUMINIUM

The superior quality of ALUMINIUM lighting fixtures produced by DURALITE is the result of years of experience combined with continuous research and product development.

The low weight, high strength, superior malleability, easy machining and good corrosion resistance of ALUMINIUM allow the production of lighting fixtures in different shapes and styles.

Furthermore the Aluminium is 100 percent recyclable with no downgrading of its qualities.
The re-melting of aluminium requires little energy: only about 5 percent of the energy required to produce the primary metal initially is needed in the recycling process.

Each aluminium item produced by DURALITE is painted in thermosetting polyester powder.

SMALL SIZE

RESIN MATERIAL DURALIGHTING®

A complete range of classic lantern in resin material DURALIGHTING® with small dimensions to light up reduced spaces and small areas.

MATERIAL

LANTERN and ARM/BASE in resin material DURALIGHTING®: a patented material studied to resist against UV-rays, corrosion and all weather agents.
It can be used in any climatic areas especially in marine environments and tropical climates.
The DURALIGHTING® is a strong and resistant material with a polished and smooth finish.

POST DP190 in resin material with an internal galvanized steel pipe.

DIFFUSER in polycarbonate UV stabilized.

TECHNICAL DETAILS

PROTECTION DEGREE: IP44

ISOLATION CLASS: II

COLOR: black (BLK)
hand shaded color:
black-rust (BLK-RST)
black-green (BLK-GRN)
black-gold (BLK-GLD)
black-silver (BLK-SLV)

LAMP: E27 – max 60W

Stainless steel screws
Fixing kit included

APPLICATIONS

- GARDEN
- BALCONY
- PORCH
- COURT

D.7010
SMALL SIZE

Light fitting for wall or ground fixing with small size lantern and arm/base in resin material Duralighting®;
diffuser in polycarbonate UV stabilized.
Post DP190 in resin material with an internal galvanized steel pipe.
Fixing kit included.
Suitable for outdoor use: garden, court, balcony, porch, residential area.

BIG SIZE

RESIN MATERIAL DURALIGHTING®

To complete the lighting fitting ranges in resin material DURALIGHTING®, the big size lantern are proposed for squares, walkways and all publics areas.

Many of them have posts and arms reinforced with internal steel pipe to guarantee a high resistance against impacts and weather agents.

MATERIAL

LANTERN and ARM/BASE in resin material DURALIGHTING®: a patented material studied to resist against UV-rays, corrosion and all weather agents.
It can be used in any climatic areas especially in marine environments and tropical climates.
The DURALIGHTING® is a strong and resistant material with a polished and smooth finish.

POST in resin material with an internal galvanized steel pipe and polyurethane foam core.

DIFFUSER AND CONE in polycarbonate UV stabilized

TECHNICAL DETAILS

PROTECTION DEGREE: IP44

IP20 U.V. RESISTANT

Techincal Information

Symbols

Product in compliance with European Union health, safety and environmental protection directive and regulations.

Fixture suitable for installation on normally infiammable surfaces.

U.V. RESISTANT

UV-stabilized material. Anti-yellowing.

Made in material which is resistant to vandalism acts.

Range of temperature between-50 and +80 degrees.

Fixture in recycling material.

Insulation Class

CLASS I

Fixture equipped with primary insulation only.
The safety of the product is guaranteed by an additional protective conductor for earth.

CLASS II

Product with double or reinforced insulation without earth devices.

CLASS III

Product suitable for very low voltage.

Protection Degree IP

Degree of protection against penetration of solid (first number) and liquid (second number)

IP23

Protected against penetration of solid bodies Ø ≥ 12 mm and protected against rain.

IP40

Protected against penetration of solid bodies Ø ≥ 1 mm.

IP43

Protected against penetration of solid bodies Ø ≥ 1 mm and against rain.

IP44

Protected against penetration of solid bodies Ø ≥ 1 mm and against water sprays.

IP54

Protected against penetration of dust and against water sprays.

IP55

Protected against penetration of dust and against water jets.

IP65

Sealed against penetration of dust and protected against water jets.

IP67

Sealed against penetration of dust and protected against extensive quantity of water.
