Classic

Outdoor Lighting

The Company

DURALITE was born out of a thirty-year strong experience in designing and manufacturing of aluminium tools and the same long presence in aluminium casting industry.

Why not apply this vast experience even to the lighting technology?

Our painstaking products research, design and full development within the company are our key to propose ever modern and actual fixtures, capable of meeting any requirements in the residential lighting for outdoor use.

Each and every piece is the fruit of constant market research and continuous improvement.

Our perfect knowledge of the characteristics of the various materials to be used is the propelling force behind our ability to produce complete series of products with different aesthetic and technologic configuration capable of compete at international level and perfectly adapting to the ever-varying market we operate in today.

Quality and Innovation

Both 'quality' and 'innovation' play vital roles for business to remain competitive.

DURALITE discovers, makes innovation and progress always working in according to the most updated international standard and regulation.

All DURALITE products are CE marked to ensure a total quality control in full respect of customer's safeness and environment.

Services

Customer Care

Our website and constantly operating telephone lines help us guarantee an efficient customer care service.

Technical Support

Thanks to the experience gathered over the years, at DURALITE we are in a position to offer both pre and after sales technical support.

Just in Time

Is a system of supplying goods as close as possible to when they are actually needed.

JIT is one of the propelling forces behind DURALITE.

In-house production guarantees quick delivery time thus facilitating the customer in terms of sales and warehouse management.

Made in Italy

DURALITE products are painstakingly designed to reflect the class and finesse of the Italian design which has always been a symbol of style and quality.

Resin Material Duralighting®

Outdoor lighting requires painstaking search of materials and technologies most suitable to guarantee high resistance.

Thus, not only did we - at **DURALITE** - conceive and patent a material which subsequently led to solid and long lasting products, but we also maintained a classy design and finishing: **DURALIGHTING®**.

DURALIGHTING® is a resin resistant to corrosion and caustic substances.

It is a UV-stabilized material resistant to any atmospheric agent.

Thus, thanks to this resistance, it is suitable for any climatic condition and above all in coastal areas with particularly high salt values.

Products made using **DURALIGHTING®** have a specific weight and smooth metal-like classy finishing.

In addition, **DURALIGHTING®** is not painted: the colour is in the raw material and thus no problems related to discoloration and fading, hence requiring least maintenance possible.

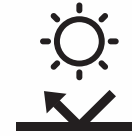

Why choose *DURALIGHTING*[®] products?

ANTI CORROSION

Resistant to any atmospheric agent

UV STABILIZED

Protected from the long-term
UV degradation effects

NO MAINTENANCE

Painting not necessary
– the color is in the paste of raw material-

SAFETY FIRST!

DOUBLE INSULATION

Not require a safety connection
to electrical earth

HIGH SPECIFIC WEIGHT

Heavy and strong material

ELEGANT STYLE AND SMOOTH FINISH

High quality and great appearance

Materials - Aluminium

The superior quality of ALUMINIUM lighting fixtures produced by DURALITE is the result of years of experience combined with continuous research and product development.

The low weight, high strength, superior malleability, easy machining and good corrosion resistance of ALUMINIUM allow the production of lighting fixtures in different shapes and styles.

Furthermore the Aluminium is 100 percent recyclable with no downgrading of its qualities.

The re-melting of aluminium requires little energy: only about 5 percent of the energy required to produce the primary metal initially is needed in the recycling process.

Each aluminium item produced by DURALITE is painted in thermosetting polyester powder.

ALPHA-LED

ALPHA - LED p.87

SMALL SIZE

RESIN MATERIAL DURALIGHTING®

A complete range of classic lantern in resin material DURALIGHTING® with small dimensions to light up reduced spaces and small areas.

MATERIAL

LANTERN and **ARM/BASE** in resin material **DURALIGHTING®**: a patented material studied to resist against UV-rays, corrosion and all weather agents. It can be used in any climatic areas especially in marine environments and tropical climates. The **DURALIGHTING®** is a strong and resistant material with a polished and smooth finish.

POST DP190 in resin material with an internal galvanized steel pipe.

DIFFUSER in polycarbonate UV stabilized.

TECHNICAL DETAILS

PROTECTION DEGREE: IP44

ISOLATION CLASS: II

COLOR: **black (BLK)**
hand shaded color:
black-rust (BLK-RST)
black-green (BLK-GRN)
black-gold (BLK-GLD)
black-silver (BLK-SLV)

LAMP: E27 – max 60W

Stainless steel screws
Fixing kit included

APPLICATIONS

- GARDEN
- BALCONY
- PORCH
- COURT

D.7010

SMALL SIZE

Light fitting for wall or ground fixing with small size lantern and arm/base in resin material Duralighting®; diffuser in polycarbonate UV stabilized.

Post DP190 in resin material with an internal galvanized steel pipe.

Fixing kit included.

Suitable for outdoor use: garden, court, balcony, porch, residential area

MEDIUM SIZE

RESIN MATERIAL DURALIGHTING®

The MEDIUM SIZE lanterns are the ideal solution for lighting up residential areas, parks and small squares.

The high resistance and quality of resin material DURALIGHTING®, the different and wide shapes - squared, rounded or hexagonal - of these ranges, are conceived in order to satisfy the different tastes of customer.

Some of those lanterns use also new generation of LED modules with a high luminous efficiency and an excellent color quality.

MATERIAL

LANTERN and **ARM/BASE** in resin material **DURALIGHTING®**: a patented material studied to resist against UV-rays, corrosion and all weather agents. It can be used in any climatic areas especially in marine environments and tropical climates. The **DURALIGHTING®** is a strong and resistant material with a polished and smooth finish.

POST DP190 in resin material with an internal galvanized steel pipe.

BIG SIZE

RESIN MATERIAL DURALIGHTING®

To complete the lighting fitting ranges in resin material DURALIGHTING®, the big size lantern are proposed for squares, walkways and all publics areas.

Many of them have posts and arms reinforced with internal steel pipe to guarantee a high resistance against impacts and weather agents.

MATERIAL

LANTERN and **ARM/BASE** in resin material **DURALIGHTING®**: a patented material studied to resist against UV-rays, corrosion and all weather agents. It can be used in any climatic areas especially in marine environments and tropical climates. The **DURALIGHTING®** is a strong and resistant material with a polished and smooth finish.

POST in resin material with an internal galvanized steel pipe and polyurethane foam core.

DIFFUSER in polycarbonate UV stabilized or globe in **PMMA**

TECHNICAL DETAILS

PROTECTION DEGREE: **IP44**
IP55
IP65

ISOLATION CLASS: **I - II**

BIG SIZE

ALUMINIUM

The charme and elegance of aluminium material are brought out in these ranges for urban lighting.

The big size lanterns are suitable for gardens, parks, walkways and squares.
In die-cast or extruded aluminium they are synonymous of resistance and durability.

MATERIAL

LANTERN and **ARM** in die-cast aluminium or aluminium alloy.

POST in die-cast aluminium and extruded aluminium.

DIFFUSER in polycarbonate UV stabilized or globe in **PMMA**.

TECHNICAL DETAILS

PROTECTION DEGREE: **IP44**
IP65

ISOLATION CLASS: **I**

COLOR: **black (BLK)**

LAMP: **E27**
METAL HALIDE - SODIUM

Stainless steel screws
Fixing kit included

APPLICATIONS

- GARDEN
- COURT
- PORCH
- RESIDENTIAL AREA
- WALKWAY
- PARK
- SQUARE

A.0107GIG

BIG SIZE

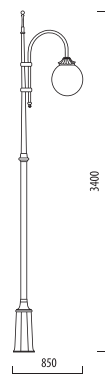

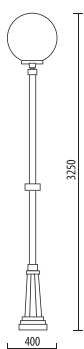

Light fitting for wall or ground fixing with arm in extruded aluminium; globe in PMMA diam. cm 40.
Post in aluminium alloy and extruded aluminium.
Fixing kit included.
Suitable for outdoor use: garden, court, porch, residential area, walkway, park, square.

LIGHT UP

Recessed light fittings of different diameters suitable for vehicles and pedestrian traffic.

The LIGHT UP creates charming atmospheres in the green environment and classical settings.

They are the ideal for lighting up buildings, monuments and gardens.

MATERIAL

BODY in die-cast aluminium with recessed box in reinforced thermoplastic.

OUTER FRAME in stainless steel 4 mm.

DIFFUSER in tempered glass 10mm.

REFLECTOR in polished aluminium.

TECHNICAL DETAILS

PROTECTION DEGREE: **IP67**

ISOLATION CLASS: **I**

Silicon gasket

APPLICATIONS

- GARDEN
- COURT
- PORCH
- WALKWAY
- STAIR

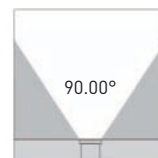

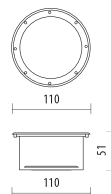

LIGHT UP

Recessed lighting fixture for floor or ground fixing with body in die-cast aluminium with recessed box in reinforced thermoplastic.

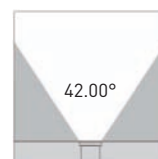

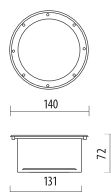

Outer frame in stainless steel 4 mm, diffuser in tempered glass 10 mm, silicon rubber gasket, reflector in polished aluminium.

Suitable for outdoor use: garden, court, porch, walkway, stair

Technical Information

Symbols

Product in compliance with European Union health, safety and environmental protection directive and regulations.

Fixture suitable for installation on normally inflammable surfaces.

U.V.
RESISTANT

UV-stabilized material.
Anti-yellowing.

Made in material which is resistant to vandalism acts.

Range of temperature between -50 and +80 degrees.

Fixture in recycling material.

Insulation Class

CLASS I

Fixture equipped with primary insulation only.

The safety of the product is guaranteed by an additional protective conductor for earth.

CLASS II

Product with double or reinforced insulation without earth devices.

CLASS III

Product suitable for very low voltage.

Protection Degree IP

Degree of protection against penetration of solid (first number) and liquid (second number)

IP23

Protected against penetration of solid bodies $\varnothing \geq 12$ mm and protected against rain.

IP44

Protected against penetration of solid bodies $\varnothing \geq 1$ mm and against water sprays.

IP65

Sealed against penetration of dust and protected against water jets.

IP40

Protected against penetration of solid bodies $\varnothing \geq 1$ mm.

IP54

Protected against penetration of dust and against water sprays.

IP67

Sealed against penetration of dust and protected against extensive quantity of water.

IP43

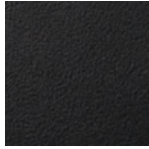

Protected against penetration of solid bodies $\varnothing \geq 1$ mm and against rain.

IP55

Protected against penetration of dust and against water jets.

General Sale Conditions

- All prices are ex-works, unless otherwise agreed above.
- The order will be accepted after a written confirmation of the proforma invoice.
- The cancellation of order can be accepted only within 24 hours from the conformation of proforma invoice.
- Transport or delivery by any means are at buyer's own risk.
The company will not be liable for any damages after goods delivery to the carrier or the consigner, even if freight fees are included in the sale price.
- All DURALITE products are strictly inspected before delivery and they are guaranteed against production defects in compliance with European safety standards for 2 years.
- The company will judge from time to time its responsibility and in case of responsibility it will proceed to the replacement.
- The faulty pieces will be given back to DURALITE company at customer's expenses.
- The warranty doesn't cover the costs of transport, uninstallation, reinstallation.
- DURALITE S.r.l. company will not be liable for any damages arising from incorrect installation, misuse or use with components of other products.
- For any controversy, the court of Brescia (Italy) will have exclusive jurisdiction .
All DURALITE S.r.l. products are produced in compliance with European safety standards.

The DURALITE S.r.l. reserves the right to make improvements to the products described in this catalogue without giving prior notice.
